

## Military pharmacy Ulm

During its 25-year existence, the military hospital Ulm has developed into an indispensable pillar of the medical service and it has acquired a solid position within the regional health care system.

Even though the name suggests that the pharmacy only supplies the hospital, it is far more than a hospital pharmacy. It is a regional [health institute](#) with dressing materials and production facilities for medicines catering for the German army.

The new pharmacy building blends in well with the other buildings of the military hospital. Congratulations to all parties that have been involved in the planning and realization. Bolidt Kunststoffvertrieb GmbH has also made a contribution by fitting special [Bolidtop® 700 PT](#) and the Bolidtop® Stato 700. Bolidt has supplied 2,000 m<sup>2</sup> of flooring and installed it in the supply room, in the chemical analysis and cytostatics preparation and in the galenics room (clean room class B – D).

The medical service of the German army has set standards once more with the newly built 20-million-euro hospital pharmacy attached to the military hospital Ulm, to the benefit of patients and staff.
