

Let the games begin!!

In the last week of July, the [Kingdom Games 2005](#) will be held in Curaçao. During this two-yearly event, Dutch, Antillean and Aruban youths will measure their strength against each other in various branches of sport. One of the objectives of the Kingdom Games is to increase mutual understanding and solidarity among the participating youths.

The Sentro Deportivo Korsou is one of the major sports complexes in Curaçao and the only complex with several facilities. It is used intensively for various local sports events at an amateur level, but also for events at an international professional level. During the Kingdom Games many important competitions will take place at the complex.

One of the facilities of the Sentro Deportivo Korsou is the athletics track. Having the right surface on a track is of vital importance to top performances. That is why, in 1997, [Bolidtan](#) sports flooring was installed at this sports complex. Bolidt cooperates with the [IAAF](#), (International Association of Athletics Federations), as a result of which Bolidtan flooring is tailored to the requirements of top-class sportsmen. To this day, the management of Sentro Deportivo Korsou is very pleased with the performance of the track. The intensive and daily use, combined with the corrosive climate of Curaçao (the heat of the sun and the salty air) have had a minimal effect on the wear resistance and colourfastness of the Bolidtan athletics track.

The track needs to be in perfect condition for the Kingdom Games. For that reason, a retopping has been applied to several areas on the track.

The athletics track in Curaçao is ready for the Kingdom Games, so let the games begin!!
