

Bolidtop 525 Deco provides 50 years of anecdotes

A nice story is always a good warming-up spiel. It is usually a funny anecdote from the past that is able to increase the temperature of the people's mood a few degrees during a wedding or at a birthday party. Within any business environment, an abundant history will do good too. A background that stands out in the present by taking advantage of the ample knowledge and experience gained in the past, creates the image of a [stable and reliable company](#). After 137 years, there is no other way to describe De Klerk Binnenbouw. In 1970, another 200 years of history was added to the company by taking over the Koninklijke Meubelfabriek (Royal Furniture factory) H.P. Mutters & Zoon. With this move, suddenly more than 200 cruiseships and the delivery of 25 cabins for the notorious 'Titanic', were added to De Klerk's historical anecdotes. In addition, Her Majesty the Queen has issued a Royal Warrant to the company. Nowadays, very exclusive furniture is manufactured for yacht building, an industry that identifies itself with luxury and excellent quality.

It is Fokkema Architects that is involved in the new build office of De Klerk in Moordrecht, and that recommends Bolidt for the floor finishes in the office building without any fuss or doubt. Just as quick as this proposal was put on the table, De Klerk (also familiar with the good reputation and quality of Bolidt) accepted it. The spread [Bolidtop](#)[®] 525 deco really turns on the charm. Poised, but with authority, the system winks at the stylish interior and every now and then it flirts with light and furniture. The decoflakes, sprinkled in the floor finish, give the tight and smooth appearance a spark of stubbornness. This floor owns all properties to conquer hearts forever. It is a flooring systems developed for aesthetical design purposes and –just like any other Bolidt system- has excellent functional properties. For [office](#) purposes, like in this case, it is resistant to intensive foot traffic and displacing of objects, it is comfortable, reduces contact noise and its very easy to give it a makeover. In any case De Klerk decides to radically change its office interior, just like it changed its history, the [Bolidtop](#)[®] system is transformed into another [colour](#) or a different kind of Bolidt floor finish in no time. It is also a very suitable starting-point for a different type of flooring. From the floor's perspective, this gift of creating a second life enables De Klerk to add many more historical anecdotes in the coming 50 years.
